NOTICES

Property Data Forms have been updated. We are awaiting processing by Transaction Desk so new fields may not appear on the form in TD yet. The Upload Listing in Transaction Desk should still work but the new fields will have to be chosen manually in Paragon after sending over the data.

The Paragon Listing Input screens will also be changed. The order of some fields will be different to match the new forms. The New Property Data form will be uploaded in MLS Documents and on SpokaneRealtor.com on Monday.

Paragon Reports. It will take SAR staff a little time to adjust the Paragon reports, such as the 1 Page Detail, to fully display the new extended Public Remarks field. Please bear with us while we get the changes completed as quickly as we can.

Thank you for your patience and cooperation during this transition. Please feel free to email Denise@SpokaneRealtor.com with any questions.
